Career Objective

To land a challenging job in a reputable company so I may broaden my knowledge, skills, and learnings. Obtain a responsible career path that will allow me to make the most of my education and experience while significantly contributing to the organization's growth.

Accomplishment

I participated in the Department-level hackathon program in 2023 and won second place.

Education

CMS College of Science and Commerce   **Coimbatore**,
Post-Graduation in Master of Computer Application   Aug 2022–April 2024

CMS College of Science and Commerce   **Coimbatore**,
Graduation in Information Technology   June 2019–May 2022

Experience

Smartinternz, Telangana   Dec 2023–Feb 2024
Software Test Automation

- I Successfully completed a comprehensive software test automation internship, gaining hands-on experience in automating test cases using Katalon Studio.
- Developed proficiency in creating and executing automated test scripts for Amazon and Cura Healthcare to ensure software quality and efficiency.

Bata, Coimbatore   Feb 2022–Sept 2023
Sales Executive

- Consistently exceeding sales targets by 100%, successfully operating in a dynamic retail environment, contributing to overall revenue growth.
- Demonstrated exceptional customer service skills, assisting clients in finding suitable footwear solutions based on their preferences and needs.

Projects

Collaborative Content Creation Platform | HTML, CSS, Git

- This platform is used to create new content, edit existing content, send reports to creators, access the admin page, add new creators with admin privileges, and share content with others.

Test Automation Using Katalon Studio | Katalon Studio, Excel, Jenkins

- Test all website functionalities using Katalon Studio. Create plans, test cases, test suites, test suite collections, perform cross-browser testing, and execute command-line testing and ect.

Files Arrangement | Python, Git

- This Python script organizes files into different directories based on their types. It creates separate folders for images, music, videos, executables, archives, torrents, documents, code files, and design files.
