

VISHNU

QA Engineer & Scrum Master | Manual · Automation · Agile Delivery

+91-90801 97960 | vishnuskalai21@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#) | Coimbatore, Tamil Nadu

SUMMARY

Versatile QA Engineer with 2+ years of experience spanning manual testing, Gen AI-assisted QA workflows, API validation, and Agile delivery. Adept at designing comprehensive test plans, identifying critical defects — including security vulnerabilities in live production environments — and driving on-time releases through effective Scrum Master responsibilities. Proficient in Playwright, Selenium, Postman, and Python, with hands-on use of ChatGPT, Gemini, and Claude to accelerate test case generation, root cause analysis, and QA reporting. Committed to elevating software quality through strategic thinking, cross-functional collaboration, and intelligent use of modern tooling.

SKILLS

Testing: Manual Testing | Automation Testing | Functional | Regression | Smoke | Sanity | API Testing | Cross-Browser Testing

Frameworks: Playwright (JavaScript) | Katalon Studio

AI Tools: ChatGPT | Gemini | Claude — test generation, log analysis, bug reporting, script assistance

DevOps & Tools: Jira | Postman | Git | GitHub | VS Code

Languages: Python | JavaScript | SQL | HTML | CSS

Methodologies: Agile | Scrum | Sprint Planning | Retrospectives | STLC | Defect Life Cycle

WORK EXPERIENCE

QA Engineer | Gyanmatrix Academy Pvt. Ltd.

Sept 2024 – June 2026

- Designed and executed end-to-end test cases for the Digri web application using Jira Test Management, achieving comprehensive coverage across smoke, regression, sanity, and functional testing phases.
- Leveraged Gen AI tools (ChatGPT, Gemini, Claude) to generate structured test cases from Jira tickets and PRDs, reducing test design time by up to 50% and expanding edge case and boundary condition coverage.
- Applied AI-assisted root cause analysis to bug logs and generated sprint-ready QA summaries and Jira-formatted bug reports — cutting debugging turnaround time and reducing manual documentation effort.
- Identified and escalated high-severity security vulnerabilities — including sensitive data exposure in API response and improper file upload handling — preventing potential production incidents.
- Served as acting Scrum Master, facilitating sprint ceremonies and owning the Jira board end-to-end across dev and QA workflows, ensuring real-time visibility and on-time product delivery.
- Coordinated between development and QA teams to resolve blockers, re-prioritize mid-sprint tasks, and conduct cross-browser and cross-platform testing for consistent release quality.

Software Test Automation Intern | SmartInternz, Telangana

Dec 2023 – Feb 2024

- Gained hands-on proficiency in Katalon Studio, developing and executing automated test suites for Amazon e-commerce and Cura Healthcare platforms — improving test coverage and reducing manual regression effort.
- Strengthened test script design, automation best practices, and QA fundamentals within a structured, real-world software development environment.

PROJECTS

digri.ai – Live Product QA | Manual Testing · API Testing · Jira · Excel

- Contributed to the full QA lifecycle of a live production application — creating test plans, authoring test cases, managing test execution, conducting exploratory and cross-browser testing, reporting bugs, and supporting release sign-off in an Agile environment.
- Defined a comprehensive Test Strategy and executed structured Test Plans, identifying 5+ high-risk defects per sprint and improving release confidence by 30%.

Collaborative Content Creation Platform | *HTML · CSS · Git & GitHub*

- Built a multi-user web platform supporting content creation, editing, and publishing with role-based access control — including admin privileges and cross-user content sharing.

Automated File Organizer | *Python · Git & GitHub*

- Developed a Python script that auto-classifies files into structured directories by type (images, audio, video, documents, archives, code, design) — eliminating manual file management effort.

EDUCATION

Master of Computer Applications (MCA)

Aug 2022 – Apr 2024

Bachelor of Science in Information Technology (B.Sc. IT)

Jun 2019 – May 2022

ACCOMPLISHMENTS

- Secured 2nd Place at the Department-Level Hackathon (2023), demonstrating competitive problem-solving ability under time-constrained, team-based conditions.
